Psychopharmacology for Counselors

www.michigancounselingassociation.com

Please join us for BIG savings by attending this $5.00 MCA membership benefit training. This training is intended to provide counselors with a brief summary of the basis for and the use of medications in mental health treatment. Mental health treatment often requires a combination of medications and counseling to maximize client outcomes. This course will provide a history of medical interventions in psychological treatment, biological basis for the use of medication in treatment, principles of psychopharmacological treatment, and classes of psychotropic medication.

Nick Erber has worked in the community mental health system of Michigan for 10 years and has worked with chronically mentally ill people during his tenure. Nick graduated from Western Michigan University with a MA in Counseling and is an LPC in Michigan. Nick has extensive experience working with clients on psychiatric medications. Adeena Whittaker has worked in the Community Mental Health System for 12 years. She has worked with adults who have chronic and persistent mental illness, personality disorders, addictions, and co-occurring substance abuse disorders. Many who have been prescribed an array of psychiatric medications. Adeena graduated from Central Michigan University with a MA in Counseling and is a LPC in Michigan.
